WELCOME TO THE 1st GCGP COURSE

Gastroenterology Course for General Practitioners (GCGP) is a specifically tailored course/meeting covering the A To Z of Gastroenterology in primary care. This course outlines various aspects of Gastroenterology care in primary care and also discusses the integrated working with secondary care to achieve the best care in a timely manner. In this course we will also discuss case based learning ,pathways ,protocols and the use of technology in the management of patients with GI conditions , "Getting it Right the First Time "GRIFT" is an important aspect of service delivery to achieve the best possible care. Sharing ,promoting, innovation and networking are key elements of providing high quality care. Digital , information , APP development, automation in health care , use of artificial intelligence , self management remote and virtual clinics are gaining popularity and the future of healthcare is rapidly changing. Over the last decade there has been several developments in information technology , digital healthcare , and use of artificial intelligence in health care management and we are having to embrace these changes which are ever changing.
