# SCOPE Medical Conference Photography 1 Day Experience

Scope Health UK is bringing this exciting, one-day internship to students of photography as well as aspiring photographers. This opportunity is designed for students to be able to capture relevant photos as part of their assignments and field of study. This internship will offer the ideal place for photographers to practice Still Photography, Group Photoshoots, Speaker Profile Shots as well as filming in an organised and controlled environment which includes numerous hands-on practical sessions with medical accessories .

This internship will take place at the conference centre in either Bristol or Manchester , and internees will be presented with the “SCOPE” of capturing lectures, audience reactions and practical session in action. If your interest lays in product photography, conference , this internship will be an incredible way to boost your portfolio as students can practice medical instrument photography with a wide range of lenses.

Like any career in any field, to establish your name in the photography industry is challenging. The motto of Scope Health UK is to mould students to become the best version of themselves, and we believe this internship will bring you one more step closer to achieving your dreams!

For further information and application to this internship program, please do not hesitate to connect with us @ [scope@scopehealthuk.com](mailto:scope@scopehealthuk.com) A letter of recommendation from your mentor/supervisor is required for consideration for this internship placement. There are very limited number of spaces for this internship so apply well in advance .
